

Bark Park gets a new part-time staffer

The Parks & Community Services Department announced it has hired a new part-time staff member to who has been assigned solely to the Bark Park.

The staffer works 24 hours a week Monday through Friday. The Bark Park is a heavily-used park which requires daily maintenance and cleaning needs. The maintenance worker is able to fill holes daily to meet safety needs, clean chairs, sweep walkways, monitor public postings, empty trash cans and assess larger maintenance needs.

Having an increased staff presence in the park has also helped with gathering feedback from the regular users in regards to park enhancements as staff moves to create a master plan for overall park improvements.
