

Residents Are Warned To Beware Of The Invasive Tiger Mosquito

With the arrival of the Asian tiger mosquito or Aedes species in the county, the Orange County Vector Control District has issued an alert and is urging residents to protect themselves and their families from mosquito bites. Aside from being itchy and annoying, the bite of an infected female tiger mosquito can spread dengue, chikungunya, or Zika virus.

The district advises residents to use mosquito repellent and mosquito-proof homes by dumping standing water both inside and outside, discarding water-holding containers not being used, and making sure all window and door screens are in good repair.
